Remarks/Directions

Client Rmks: **What an incredible property in an absolutely perfect setting on this Thornbury cul de sac lined with equally stunning homes. The beautiful, zen curb appeal opens up to the full splendor of this custom modern**

bungalow home and its 3,443 square-foot main floor with a similar-sized finished lower level. Both floors are full of incredible light and luxury. The landscaping was designed to frame the beautiful views so that every window -- and there are many and they are exceptionally large -- is like a piece of art itself. The architectural design wraps the great room, primary wing and office around an outdoor courtyard -- a 1,200 square-foot oasis with a covered seating area and a buffer of trees along the property line for privacy. The wall of windows to the courtyard stacks to one side for a wide open view and seamless indoor/outdoor living. The split design allows for a quiet, private, spa-like primary bedroom on one side of the house and the three other bedrooms and office on the other, easily closed off by a massive sliding barn door. The lower level has two more generous bedrooms, an entertainment area and games room with gas fireplace, and a large finished bonus room that would be ideal as a home theater, a golf simulator or a dream wine cellar. So many well curated details: Hunter Douglas electric blinds in most rooms, over the top lighting and fixtures throughout, laundry room and built-ins for a well organized home. The great room? You just have to see it but like the rest of the house it is tasteful and luxurious, everything you would expect in a home of this quality.

Inclusions: Refrigerator, Gas Cooktop, Built-In Oven, Built-in Convection/Microwave, Built-in Coffee Station, Dishwasher, Washer, Dryer, Window Coverings, TV & mounting hardware (living room, primary bedroom, bedroom, rec room), Garage Door Opener & Remotes, Hot Tub and all Related Equipment, Built in BBQ/Refrigerator/Cookstation in the Courtyard

Utility: 10'6" x 12'
Utility: 12' x 11'10"

Floor Area Information

Floor areas include footprint area of interior walls. All displayed floor areas are rounded to two decimal places. Total area is computed before rounding and may not equal to sum of displayed floor areas.

Main Building

MAIN FLOOR

Interior Area: 3136.25 sq ft
Excluded Area: 576.79 sq ft
Perimeter Wall Thickness: 10.0 in
Exterior Area: 3443.01 sq ft

LOWER LEVEL (Below Grade)

Interior Area: 2897.37 sq ft
Perimeter Wall Thickness: 10.0 in
Exterior Area: 3198.93 sq ft

Total Above Grade Floor Area, Main Building

Interior Area: 3136.25 sq ft
Excluded Area: 576.79 sq ft
Exterior Area: 3443.01 sq ft

110 Pheasant Run, Thornbury, ON

iGUIDE Method of Measurement

Definitions

Interior Area is a per floor calculation, made by measuring to the inside surface of the exterior walls. The footprint of all interior walls and staircases is typically included.

Excluded Area is a sum of the area of all rooms (measured to the inside surface of room walls) that are excluded from the Interior Area for a floor and the footprint of corresponding walls. Prescribed area exclusions can vary from region to region. Examples of exclusions are spaces open to below, garages, cold cellars, crawl and reduced height spaces.

Exterior Wall Footprint is the sum of the estimated area of the perimeter wall segments bounding both Interior and Excluded Areas.

Exterior Area is a per floor calculation, made by measuring to the outside surface of the exterior walls and is represented by the sum of the Interior Area and the Exterior Wall Footprint.

Grade is the ground level at the perimeter of the exterior finished surface of a house. A floor is considered to be above grade if its floor level is everywhere above grade.

Total Interior Area is the sum of all Interior Areas.

Total Excluded Area is the sum of all Excluded Areas.

Total Exterior Area is the sum of all Exterior Areas.

Finished Area is a per floor calculation made by adding all enclosed areas in a house that are suitable for year-round use based upon their location, embodying walls, floors, and ceilings and which are similar to the rest of the house. Footprint of walls is attributed to finished area only when the walls are bounding finished areas.

Unfinished Area is a per floor calculation made by adding all enclosed areas that do not meet the criteria for Finished Area. Exceptions are outdoor and non-walkable areas, for example porches or areas open to below. Footprint of walls is attributed to unfinished area only when the walls are exclusively bounding unfinished areas.

Notes

For exterior walls that are adjacent to the outside of the property, where typically only the interior side has measurement data, an estimation of the exterior wall thickness (as directly measured at the property) is used to calculate its footprint. Considerations are not made for varying wall thickness along the perimeter.

Disclaimer

All dimensions and floor areas must be considered approximate and are subject to independent verification.
